

Snap-Tite

Full range of Snap-Tite stainless steel quick disconnect couplings available in sizes from 1/4" through to 4" in both "H" and 71 series.

H Series quick disconnects have been proven by years of use on hydraulic-pneumatic applications and in handling of many gases and fluids.

The 71 Series couplings are designed for today's applications including special features for modern needs – high pressure, dry break, push-to-connect, rugged, versatile, low pressure drop.

SNAP-TITE QUICK RELEASE COUPLINGS

Prochem NPT

PROCHEM 316 NPT 2000 W.O.G. FULL BORE BALL VALVE

TWO PIECE, NPT END 8MM - 50MM (1/4" - 2") 2000PSIG.

Full Bore 2-piece threaded valves allowing straight-through flow. Virtually no head loss and a superior performer with mildly abrasive as well as corrosive fluids. Ideal for in-line control of process fluids.

Available in sizes 8mm through 50mm:

- Full Port
- Two Piece body
- Investment cast CF8M
- Anti-blowout stem
- Adjustable stem packing
- All 316 wetted and non wetted components
