

Circle

Circle Seal Controls Inc.
is a manufacturer of
reliable solutions in
valves and controls for
hydraulic, pneumatic,
and cryogenic systems.

Seal

We offer the industry's widest choice of quality precision valves and controls for industrial and aerospace/military applications. Our products include check valves, relief valves, shutoff valves, solenoid valves, cryogenic valves, sampling and bleed valves, electro-mechanical valves, float, vacuum, and pilot operated valves; pressure regulators; tyre fill valve gauges; gauge savers; temperature compensating pressure regulation systems.

Excess Flow

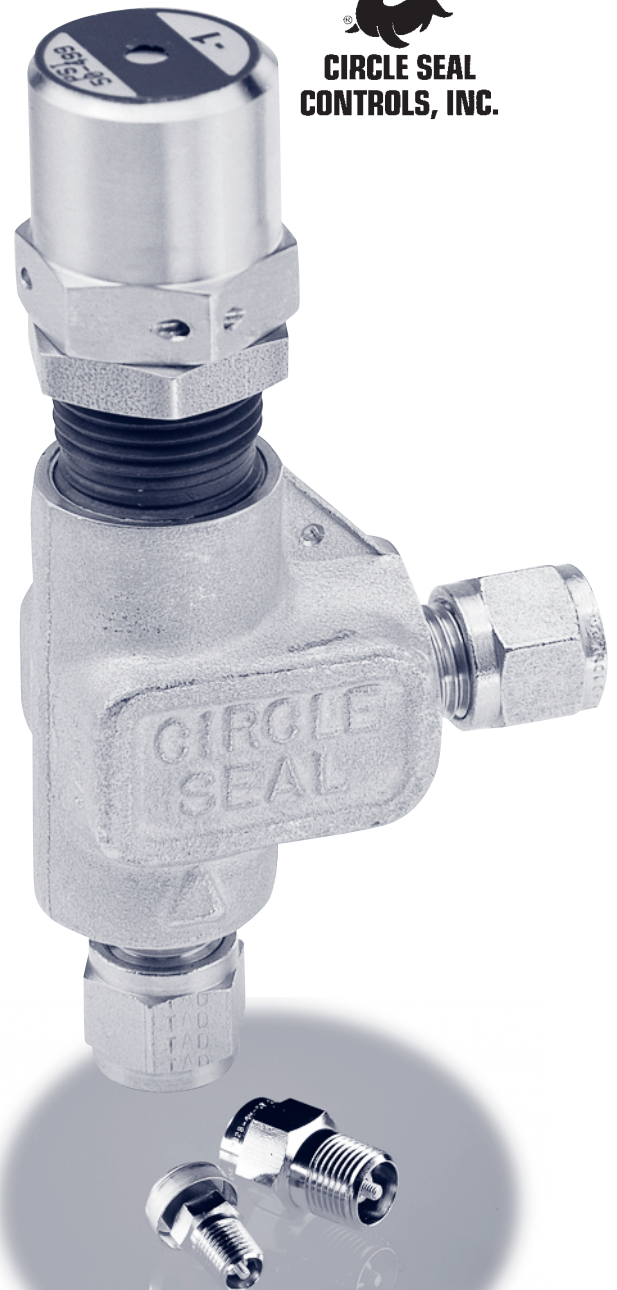

Stop uncontrolled discharge of system media in the eventuality of a downstream line rupture.

- Safety shut-off
- Surge protection
- Variety of end connections
- Variety of seals
- Automatic reset

CONTROLS, INC.**

Check Valves

A wide selection of check valves for liquid and gas service.

- Connections from 1/8" to 2" in compression, female pipe, US and British threaded ends.
- Various body materials ie. stainless steel, brass, carbon steel, aluminium
- Pressure ratings to 20,000 psig
- Zero leakage at low back pressure
- Various seat materials

Inline and right angled adjustable pressure relief valves.

- Connections from 1/8" to 1 1/2" (sizes vary for different models)
- Stainless steel, brass, steel and aluminium
- Operating range 0-10,500 psig
- Zero leakage
- 0.5 to 10,500 psig cracking pressure
- Positive reseal

Relief Valves
